SUMMARY

Software Engineering student with strong hands-on experience in Android development using Kotlin and Jetpack Compose, and practical experience in web development with React and Spring Boot. Built multiple real-world applications following MVVM and Clean Architecture principles.

TECHNICAL SKILLS

- **Android:** Kotlin, Jetpack Compose, MVVM, Clean Architecture, Room, Firebase
- **Web:** React, JavaScript, HTML, CSS
- **Backend:** Java, Spring Boot, REST APIs, Role-based Security
- **Tools:** Git, Android Studio, IntelliJ IDEA, MySQL

PROJECTS

- **FinanceApp — Android (Kotlin, Jetpack Compose)**
 - Personal finance management app built using Clean Architecture and MVVM
 - Track income and expenses, manage budgets with live progress tracking
 - Multi-currency support (TRY, USD, EUR, AED) and CSV import/export
 - Visual reports and charts for financial insights
- **BookManager — Android (Kotlin, Room, Firebase)**
 - Reading list management app with CRUD operations and search/filtering
 - Track reading progress with dynamic progress bars
 - Authentication via Email, Google, and Guest mode
 - Local persistence with Room and optional Firestore sync
- **Smart Hospital Appointment System — Web**
 - React, Spring Boot, Java, MySQL
 - Full-stack hospital management system with role-based access (Patient, Doctor, Admin)
 - Patients book appointments and view history, diagnosis, and prescriptions
 - Doctors manage appointments and write prescriptions integrated with medicine API
 - Admin manages users, departments, and doctor assignments
- **BMI Calculator — Android (Kotlin, Jetpack Compose)**
 - BMI calculation with metric and imperial unit support
 - History tracking and modern Compose-based UI

EDUCATION

B.Sc. in Software Engineering — Fatih Sultan Mehmet Vakif University
Expected Graduation: July-2026
